EXPERIENCE

Software Engineer Intern

1/2025 - 5/2025

FPT Software · Ho Chi Minh City

- Gained practical experience across the SAP ecosystem including SAP RAP, SAP Fiori, SAP BTP, and enterprise modules through structured, project-based training
- Developed and delivered features for company-assigned enterprise products, collaborating within a team to meet project requirements
- Presented completed features to managers, mentors, and stakeholders across multiple sprint reviews; incorporated feedback to iteratively improve product quality

ACADEMIC CAPSTONE PROJECT - TEAM LEADER

2025-2026

FPT University HCM - Problem scope proposed by FPT Software

- Led a 5-member team to architect and deliver a 22-feature enterprise system replacing legacy SAP SM36/SM37 transactions, across a 15-week Agile lifecycle
- Built a real-time job failure monitor (1-second polling loop) with a 3-level auto-escalation engine sending alerts via Email (Brevo API) and Microsoft Teams (Azure Logic Apps)
- Developed a modern SAP Fiori dashboard with OData V4, supporting job lifecycle actions (Create, Release, Repeat, Copy, Stop, Delete) and an analytical drill-down page with KPI charts
- Integrated a Microsoft Copilot Studio AI Agent consuming a custom OData V4 API to query job failures ranked by RiskScore via natural language
